PERSONAL PROFILE

An enthusiastic and dedicated IT professional seeking a challenging role in a dynamic organization. Experienced in working with teams, demonstrating patience, and effectively managing time. Eager to apply a strong work ethic and a focus on professional growth to contribute to technological innovation and operational efficiency.

WORK EXPERIENCE

E-COMMERCE MARKETING INTERN (LAHORE, PAKISTAN) 2/5/2022-12/10/2022

Managed e-commerce marketing strategies on Shopify. Conducted market research to identify international retail pages on Instagram. Team developed and managed product stores on Shopify for easy product sales

WEB DEVELOPING(MANAGING) (UAE, REMOTE) 3/16/2023-1/10/2024

As a remote web developer for a UAE-based real estate company, I designed and maintained the company website using Angular for the front end and .NET for the back end. I managed property listings, uploaded and optimized home images, and created graphics to enhance the site's visual appeal, ensuring a seamless user experience.

ADMA SHAMRAN COMPANY (KSA, RIYADH) CURRENT 8/24/2024

- Led digital marketing initiatives, including graphic design, social media management, and the creation of promotional materials such as flyers.
- Developed a social media links page for ADMA's HORECA event and future promotions using HTML, Bootstrap, and CSS, enhancing accessibility to brand channels.
- Built a dynamic data collection form using HTML, Bootstrap, CSS, JavaScript, and PHP, fully integrated with phpMyAdmin to streamline and automate internal processes.
- Spearheaded the setup and optimization of the company's e-commerce store on Salla, managing product data, inventory, and store design to ensure a smooth launch.
- Customized the e-commerce platform to display products effectively, resulting in a user-friendly and seamless shopping experience.
- Digitalized HR processes by developing online forms (e.g., salary increments, vacation salary, new employee onboarding) using React.js for the frontend and ASP.NET (C#) for backend APIs, with Microsoft SQL Server as the database.
- Previously, the HR team relied on Word documents and manual file checking.
- After the new system, staff can simply enter the employee code to auto-fill past data and calculations, reducing time and manual errors.
- Personally conducted process analysis to identify and digitize the most time-consuming HR tasks.
- Maintained and updated the company website admaShamran on WordPress:
- Added new brands, products, and company news.
- Organized brand logos, images, and content to ensure a professional and consistent online presence.

As the company expanded into tech with a new brand called Thought Valley:

- Developed a modern landing page website using React.js.
- Supported local design projects by creating marketing materials using Canva.

Handled the complete employee data and attendance system in Odoo's HR module, successfully implementing and maintaining a fully functional HR and Attendance Management System.

Developed the Request Transfer Form application featuring a structured multi-role approval workflow involving five user levels, using Node.js, .NET, React, and Microsoft SQL Server for backend, frontend, and database integration:

- Preparer: Creates and submits the initial request.
- Verifier: Reviews, verifies, or returns forms with remarks for correction.
- Approver: Approves, rejects, or returns requests with comments for further review.
- Payment User: Processes approved forms, uploads payment receipts, and finalizes transactions.
- Checker: Reviews finalized forms and monitors payment records.

The system ensures transparency and accountability by maintaining real-time status updates, remarks tracking, and document attachments.

Additionally, designed and implemented three supplementary financial forms – Bank Positions, Amount to Pay to Brands, and Bank Facilities – providing options to select banks and brands while managing corresponding amounts efficiently.

CERTIFICATIONS

- Sub-Core Campus Ambassador Certificate, University of Central Punjab,
- TAAKRA 2023 Sub-Core Registration Team Certificate, University of Central Punjab,
- TAAKRA 2024 Director Logistics Award, University of Central Punjab, 2022-2024

PROJECTS

Hospital Management System: Developed an object-oriented system for managing patient appointments and medicine distribution, improving efficiency and accuracy.

Game Development: Created a 2D zombie-themed game with level progression, showcasing creativity and problem-solving skills.

Final Year Project: Designed a traveling website for tours and organizers using Angular 14 for the front end and .NET for APIs and database management, enabling tour bookings and organizer tools.
